A cactus (plural: cacti, cactuses or cactus) is a member of the plant family Cactaceae, within the order Caryophyllales.

Cacti come in a wide range of shapes and sizes. Many species are used as ornamental plants, and some are also grown for fruits, fodder, forage, and other uses.

With a few exceptions, cacti are water-retaining plants and have a variety of adaptations that enable them to survive in hot and dry environments.

Phenomenons in Human Gesture: The Cactus Pose
